

Invitation

Towards a new Compact on Peatlands for Climate Protection

German Pavilion, UNFCCC CoP 23, Bonn (Bonn Zone)

Monday, 6 November 2017

10:00 – 11:30

Peatlands cover only 3% of the global terrestrial area, but store as much carbon as the entire terrestrial biomass. **Loosing peatlands' capacity for carbon sequestration means forfeiting tremendous opportunities for climate change mitigation and adaptation.** Joint efforts to conserve and restore peatlands will be introduced and discussed.

Speakers

| | |
|-----------------------|---------------------------------------------------------------------------|
| Beate Jessel | President of German Federal Agency for Nature Conservation (BfN) |
| Olaf Tschimpke | President of NABU |
